BUSINESS EXPERIENCE

2019 - 2020

RAIFFEISEN CENTROBANK AG, Vienna, Austria

Leading Austrian and Eastern European Investment Bank

Student Trainee Structured Products – Trading and Origination (8 months)

- Executed daily emission process (CEE region): exchange and Bloomberg/Reuters listing and introduction of the new products, working closely together with Sales, to 50+ external client advisors
- Interface in company-wide collaboration: internal product implementation (~5 a week) including final pricing checks, risk management, regulatory control and hedging strategy as part of the listing process
- In consultation with trading desk investigated big data analysis of trades in factor certificates (~ 100,000) and cleared open interest positions, thus preventing financial damage of EURO ~1 m
- Validated and increased internal data quality of 80,000 products: comparison with external data and establishment of robotic reporting, coordinated and redirected to 10 representatives of 3 departments

2019

DEUTSCHE BANK AG, Frankfurt, Germany

Summer Analyst Global Markets Technology (2 months)

- As part of the team in London, devised and pitched a statistic tool leveraging information of weekly reporting processes of 20+ CIB divisions in close cooperation with database set-up partners in Russia
- Consulted key stakeholder's management located in UK by building and presenting a MI dashboard on regulatory reporting progress regarding Brexit, along with preceding negotiations with related team
- Expanded VBA-mapping tool for 5 different types of leveraged products by decomposing each product and finding similarities in indicators (80% mark) with products covered by the risk management unit

2018

UNICREDIT BANK AG, Vienna, Austria

Summer Intern Markets (3 months)

- Conducted sales tasks for retail banking clients and evaluated associated position on the Austrian Market (10+ significant competitors), hence tailored product range after strategic consideration with colleagues
- Set up and led a survey at senior management level including a subsidiary, thus improved workflow between 8 divisions by resolving communicative issues in follow up meetings organised jointly with CAO
- Collaborated to price structured investment products for private investors with equity and commodity underlying: valued derivatives part using Black Scholes Models via VBA
- Initiated automation of daily P&L calculation of whole Vienna branch: reduced working time by 90%, instructed a group of 4 in new creation procedure
